Re: Response to the April 19 Letter Requesting Elimination of the Remedial  
Design/Remedial Action Work Plan Addendum 3 for V-Tanks Phase 2  
Treatment, OU 1-10, WAG 10, Test Area North

Dear Mr. Jensen:

EPA received your letter on April 24 requesting concurrence to eliminate the requirement for the Remedial Design/Remedial Action Work Plan Addendum 3 for V-tanks Phase 2 Treatment. This request was based on the statement that the remediation of the V-tanks content is complete and thus there is no need for the next treatment step, chemical oxidation. EPA concurs that Phase 1 successfully removed the contaminants and agrees that there is no need for Phase 2 treatment. Accordingly, the delivery of this work plan can be deleted.

If you have any questions regarding this letter, please have someone on your staff contact Matt Wilkening at 208/378-5760.

Sincerely,

A handwritten signature in black ink, which appears to read "Nicholas Ceto", is written over a horizontal line.

Nicholas Ceto, Program Manager  
INL Project
